

## Could you be the next Apple apprentice?

Dare to dream big!

**As mathematicians,** we will be developing our understanding of measurements and geometry. Furthermore, we will develop our understanding of ratio and how we can solve questions that include it.

**As writers,** we will use our quality text, 'Jumanji', to extend our vocabulary by writing for different purposes. In addition, we will be writing explanatory texts and reports about light and electricity based on our topic learning.

**As RE enthusiasts,** we will be investigating who inspires us. This includes different Muslims and Christians.

**As scientists,** we will investigate and discover what components can be included in an electrical circuit. We will also create our own circuits which will include differing equipment.

**As artists and designers,** we will be designing and producing our very own electrical board game. We will need to think about what material to use as well as how best to market our product.

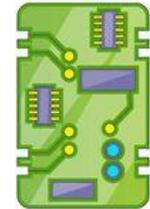

**As readers,** we will continue to develop our skills in preparation for future tests. We shall be considering why an author has used certain grammatical structures alongside inferring the meaning of the text.

**In computing,** we will use different types of technology to advertise our inventions. We will also further develop our skills in coding.

**As athletes,** we will participate in a variety of games that will develop our multi-skill ability. We will be focussing on throwing and catching by playing a variety of games.

### Promoting British Values

In our science learning, we will be democratic in decisions through team work as well as showing tolerance of others ideas and feelings in the group. We will consider the rule of law when thinking about why board games must be made using certain material and we will be considering individual liberty through our RE learning.

Year Six  
Summer Term 1

#### Developing Socially – we will...

use a range of social skills in different contexts. This will be by working with others on a shared goal.

#### Developing Morally – we will...

appreciate the viewpoints of others when creating our board games.

#### Developing Culturally – we will...

be willing to participate in and respond positively to artistic, musical, sporting and cultural opportunities.

#### Developing Spiritually – we will...

use imagination and creativity in our learning.
